Dear Customer,

Our products are made out of recycled car-tires, rubber. The production process can possibly make the product smell a little for a couple of days, but don't worry, this will definitely go away.

Maximum 60 days, but in most cases where smell occurred it took around 7 days to lose the bad smell.

Resuming; The smell definitely goes away.

Don't hesitate to contact your contact person for any further questions or remarks!

With kind regards,

Multy Home Europe
